

## **On-Site training Requirements**

### **Hardware requirements**

1. Pentium IV or equivalent personal computer with processor speed greater than or equal to 2.4 GHz, preferably dual core or quad core.
2. At least 100 GB available space on the host computer – some courses may require more hard drive space
3. At least 2 GB of Memory, preferably 4GB. Some courses may require up to 8GB (Hyper-V).
4. DVD-Rom
5. At least 128 MB Graphic Card
6. (17 inch/ 43 centimeter) Super VGA monitor
7. 10/100 Mb/s required full duplex network card, preferably 1000 Mb/s.
8. PCI bus must meet 2.1
9. USB 2.0

### **Software Requirements**

1. XP Professional SP2, Windows 7 or Windows Server 2008 (Hyper-V) as host
2. Full local administration rights on computers as software will need to be installed and uninstalled after the course has been completed. Virtual PC needs to be installed.
3. A shared folder on all the computers – this will be used to copy the image to the local drives.
4. Network access to copy the image from one location to the computers.
5. Access to this location as the image needs to be deleted when the course has been completed.
